

## Ginkgo biloba 'Autumn Gold'

|                              |                                                                                       |
|------------------------------|---------------------------------------------------------------------------------------|
| <b>Height</b>                | 15-25 m                                                                               |
| <b>Width</b>                 | 9-12m                                                                                 |
| <b>Crown</b>                 | broad conical, light, open crown, capricious growing                                  |
| <b>Bark and branches</b>     | brown, grey                                                                           |
| <b>Leaf</b>                  | green                                                                                 |
| <b>Autumn colour</b>         | yellow                                                                                |
| <b>Flowers</b>               | green, flowers in April                                                               |
| <b>Fruits</b>                | fruitless cultivar                                                                    |
| <b>Spines/thorns</b>         | None                                                                                  |
| <b>Toxicity</b>              | usually not toxic to people, (large) pets and livestock                               |
| <b>Soil type</b>             | clayed soil, loamy soil, sandy soil, peaty soil, all soil types                       |
| <b>Paving</b>                | tolerates paving                                                                      |
| <b>Winter hardiness zone</b> | 5a (-28,8 to -26,1 °C)                                                                |
| <b>Wind resistance</b>       | fairly to good                                                                        |
| <b>Other resistances</b>     | resistant to frost (WH 1 - 6), can withstand wind                                     |
| <b>Application</b>           | avenues and broad streets, tree containers, roof gardens, industrial areas            |
| <b>Shape</b>                 | clearstem tree, feathered tree, multi-stem treem, clearstem conifer, specimen conifer |

An American selection with a uniform manner of growth, initially narrow pyramidal, later broad pyramidal. The main trunk grows straight and branches grow in an open pattern. Height 15 - 25 m, width to approx. 15 m. Slow-growing, particularly when young. The fan-shaped leaves and flower buds are on short shoots. The leaves grow in bundles of 3 - 5 together and have an incised top. The lovely golden yellow colouration in the autumn, one of the selection criteria for 'Autumn Gold' adds extra decorative value. It is a male selection without fruit, thus suitable as avenue and street tree. It requires a site with ample light and tolerates heat well. Winter hardiness zone: 5a
