

Ginkgo biloba 'Horizontalis'

Height	3-5 m
Width	4-6m
Crown	broad weeping, light, open crown, capricious growing
Bark and branches	brown, grey
Leaf	green
Autumn colour	yellow
Flowers	green, flowers in April
Fruits	fruitless cultivar
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
Paving	tolerates paving
Winter hardiness zone	5a (-28,8 to -26,1 °C)
Wind resistance	fairly to good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Application	tree containers, roof gardens, industrial areas, small gardens, patio gardens
Shape	clearstem tree, feathered tree, multi-stem treem, clearstem conifer, specimen conifer

This cultivar has horizontally spreading branches if it is grafted at ground height. If grafted on a stem, the branches hang down somewhat. This creates a fairly flat parasol shape. As a result, it does not take on a truly weeping character. 'Horizontalis' is often confused with the cultivar 'Pendula' which has more hanging branches. The tree grows slowly, rendering it suitable for small gardens, as well. The fan-shaped leaves grow in bundles of 3 - 5 together and have an incised top. 'Horizontalis' is generally not as brilliantly coloured in the autumn. It requires a site with ample light and tolerates heat well. Winter hardiness zone: 5a
