

# Metasequoia glyptostroboides

## 'Waasland'

|                       |                                                         |
|-----------------------|---------------------------------------------------------|
| Height                | 10-12 m                                                 |
| Width                 | 3-5m                                                    |
| Crown                 | narrow conical, half-open crown                         |
| Bark and branches     | flaking, grey, reddish brown                            |
| Leaf                  | green                                                   |
| Autumn colour         | orange                                                  |
| Flowers               | yellowgreen, flowers in May                             |
| Fruits                | green, reddish brown                                    |
| Spines/thorns         | None                                                    |
| Toxicity              | usually not toxic to people, (large) pets and livestock |
| Soil type             | loamy soil, sandy soil, peaty soil, acid soil           |
| Soil moisture         | suitable for wet soil                                   |
| Paving                | tolerates paving                                        |
| Winter hardiness zone | 5b (-26,0 to -23,4 °C)                                  |
| Wind resistance       | good                                                    |
| Other resistances     | resistant to frost (WH 1 - 6), can withstand wind       |
| Application           | avenues and broad streets, industrial areas             |
| Shape                 | clearstem tree, clearstem conifer, specimen conifer     |
