

Taxus baccata 'Dovastoniana'

Height	3-5 m
Width	3-5m
Crown	broad weeping, light, open crown, capricious growing
Bark and branches	flaking, reddish brown
Leaf	green, evergreen
Flowers	yellow, green, flowers in March
Fruits	red
Spines/thorns	None
Toxicity	has toxic components
Soil type	clayed soil, loamy soil, sandy soil, acid soil, calcareous soil
Paving	tolerates no paving
Winter hardiness zone	6 (-23,3 to -17,8 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
Application	tree containers, roof gardens, industrial areas, small gardens, patio gardens
Shape	specimen conifer

Small tree sometimes with several upright central leaders reaching a height of 3 to 5 m. The primary lateral branches are horizontal and their tips hang down vertically. The lateral branches and twigs also hang down vertically. This creates a broad conical tree. The bark is brown-red and flakes off when mature. The very dark green needles are 2 to 3.5 cm long. They look lovely against the old bark. The tree is male, but it occasionally produces a female branch, recognisable by the fruit yield. Poisonous seeds are enclosed by an oval, fleshy red aril. Broad park tree for any well-drained soil.
