

## Castanea sativa 'Pyramidalis'

<b>Height</b>	25-30 m
<b>Width</b>	6-10m
<b>Crown</b>	round, dark, dense crown
<b>Bark and branches</b>	brown, grey
<b>Leaf</b>	green
<b>Flowers</b>	cream white, flowers in June, July, fragrant flowers
<b>Fruits</b>	edible fruits, brown
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
<b>Paving</b>	tolerates no paving
<b>Winter hardiness zone</b>	6a (-23,3 to -20,6 °C)
<b>Wind resistance</b>	good
<b>Other resistances</b>	resistant to frost (WH 1 - 6), can withstand wind
<b>Fauna tree</b>	resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies
<b>Shape</b>	clearstem tree

Castanea sativa 'Pyramidalis'. A tree up to 30 m tall that is clearly distinguished from the species by its persistently narrower crown. The crown is pyramidal to conical. The heavy, squat, dark grey trunk twists on its axis taking the deep grooves in the bark with it. Young branches are olive-green but quickly turn reddish-brown. The elongated leaf is dark green and glossy and has a serrated edge. The flowers and fruit are the same as those of the species. But the tree flowers some weeks earlier than does the species. Winter hardiness zone: 6a
