

## Castanea sativa 'Variegata'

|                       |                                                                             |
|-----------------------|-----------------------------------------------------------------------------|
| Height                | 8 m                                                                         |
| Width                 | 6-8m                                                                        |
| Crown                 | round/spherical                                                             |
| Bark and branches     | brown, grey                                                                 |
| Leaf                  | variegated, off white/ green                                                |
| Flowers               | cream white, yellowgreen, flowers in March, fragrant flowers                |
| Fruits                | edible fruits, brown                                                        |
| Spines/thorns         | None                                                                        |
| Toxicity              | usually not toxic to people, (large) pets and livestock                     |
| Soil type             | loamy soil, acid soil                                                       |
| Paving                | tolerates no paving                                                         |
| Winter hardiness zone | 6a (-23,3 to -20,6 °C)                                                      |
| Wind resistance       | good                                                                        |
| Other resistances     | resistant to frost (WH 1 - 6), can withstand wind                           |
| Fauna tree            | resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies |
| Shape                 | clearstem tree, multi-stem treem                                            |
