

## Cornus florida 'Cloud Nine'

<b>Height</b>	4-7 m
<b>Width</b>	4-6m
<b>Crown</b>	flatened spherical, dark, dense crown, capricious growing
<b>Bark and branches</b>	grey
<b>Leaf</b>	green
<b>Flowers</b>	white, flowers in May
<b>Fruits</b>	red
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	loamy soil, sandy soil, peaty soil, acid soil
<b>Paving</b>	tolerates no paving
<b>Winter hardiness zone</b>	6b (-20,5 to -17,8 °C)
<b>Wind resistance</b>	good
<b>Other resistances</b>	resistant to frost (WH 1 - 6), can withstand wind
<b>Fauna tree</b>	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
<b>Application</b>	small gardens, patio gardens
<b>Shape</b>	clearstem tree, multi-stem treem

Grows from a shrub into a small, multi-stemmed tree with a broad, somewhat irregular, flat-topped, spherical crown. This cultivar has dark green leaves that barely change colour in autumn. Each flower head is surrounded by four white bracts that conspicuously overlap each other. Blossoms very profusely even when young. Performs very well in a warmer climate. Supposed to be hardier than other cultivars, this has never been proven in Europe. The plant is shallow rooting with a fibrous root system and requires humic soil, which is not too dry.
