

Fraxinus excelsior 'Nana'

Height	4-6 m
Width	3-5m
Crown	round/spherical, half-open crown
Bark and branches	brown, grey
Leaf	green, feathered leaf
Flowers	none
Fruits	fruitless cultivar
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, calcareous soil
Soil moisture	suitable for wet soil, withstand short flood
Paving	tolerates partial paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt
Application	narrow streets, tree containers, roof gardens, coastal areas, industrial areas, small gardens, patio gardens
Shape	clearstem tree

Fraxinus excelsior 'Nana' is a shrub, sometimes grafted on a standard or half-standard of F. excelsior. As a tree it can attain a height of 4 - 6 m. The crown is spherical and very open, which is why it has never become popular. The bark is grey brown. The compound, dark-green leaf is odd-pinnate, 15 - 20 cm large and has 9 - 11 leaflets that are slightly smaller than of the F. excelsior. It has no flowers or fruits. 'Nana' is applied as a decorative shrub in (small) gardens, little squares and narrow streets with wide green verges. It prefers moist, nutritive soil. Winter hardiness zone: 4
