

Hamamelis x intermedia 'Diane'

Height	4-5 m
Width	4-5m
Crown	broad vase-shaped, dark, dense crown, capricious growing
Bark and branches	brown
Leaf	green
Autumn colour	orange, red, purple
Flowers	bronze, red, flowers in January, fragrant flowers
Fruits	brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	loamy soil, sandy soil, peaty soil, acid soil
Paving	tolerates no paving
Winter hardness zone	6b (-20,5 to -17,8 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Application	tree containers, small gardens, patio gardens
Shape	clearstem tree, multi-stem tree

Sturdy shrub with a round to fan-shaped growth pattern, up to about 2.5 cm tall. Rarely grows into a small tree. The slightly glossy leaf turns from yellow-orange to dark purplish red in autumn. Blossoms around late January/mid-February with very slightly fragrant, bronze-red flowers up to 4 cm in diameter. 'Diane' was named in 1969 and introduced by Robert and Jelena de Belder of Arboretum Kalmthout in Belgium. They named the plant after their daughter. Though one of the older H. x intermedia cultivars, 'Diane' is still among the best red-blossoming Hamamelis.
