

Magnolia ×brooklynensis

'Woodsman'

Height	4 m
Width	2-4m
Crown	flatened spherical, dark, dense crown, capricious growing
Bark and branches	brown, grey
Leaf	green
Flowers	voiletpink, flowers in April, fragrant flowers
Fruits	inconspicuous
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
Paving	tolerates partial paving
Winter hardiness zone	6 (-23,3 to -17,8 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Application	avenues and broad streets, small gardens
Shape	feathered tree

Grows from a shrub into a small tree with a broad, ovoid to flat-topped spherical crown with a height of about 4 m. The flower buds only develop in spring, so they cannot freeze in the winter. Depending on the temperature, the fragrant flowers open around mid-April. They are up to 15 cm in diameter and have an unusual but extremely attractive colour pattern. The outer petals are soft greenish-yellow to light olive green and the inner petals are a soft purplish pink. The inside of the leaves is cream.
