

Magnolia denudata YELLOW RIVER ('Fei Huang')

Height	6-8 m
Width	6-8m
Crown	broad ovoid, dark, dense crown, capricious growing
Bark and branches	brown, grey
Leaf	green
Flowers	cream white, light yellow, flowers in March, fragrant flowers
Fruits	red, green, redgreen
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
Paving	tolerates partial paving
Winter hardiness zone	6 (-23,3 to -17,8 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Application	avenues and broad streets, small gardens
Shape	clearstem tree, multi-stem treem
Synonyms	Magnolia denudata 'Yellow River'

Small to medium size tree with a broad ovoid crown, up to about 8 m. This cultivar, imported from China, remains smaller than others in the species. The young twigs initially bear hairs but lose these after the first season. Untypically of the species, the large, vase-shaped flowers are cream to light yellow. The petal base is often light yellow, while the tip is cream. This gives the tree a ‘yellow’ appearance. The flowers have a delightful, citrus-like fragrance. The tree blossoms fairly profusely even when young, making it an attractive park tree.
