

Magnolia 'Genie'

Height	4-6 m
Width	4-6m
Crown	oval, half-open crown, capricious growing
Bark and branches	brown, grey
Leaf	green
Flowers	deep purple-red, flowers in April-May
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
Paving	tolerates partial paving
Winter hardiness zone	6 (-23,3 to -17,8 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Application	small gardens
Shape	clearstem tree, multi-stem treem

'Genie' is a New Zealand cultivar that was selected for its very dark flower colour, rich flowering and the fact that the tree flowers profusely at a young age. From a large shrub form, 'Genie' grows into a small tree with a height of 4 to 6 m with a semi-open, oval crown. The relatively thick twigs bear fresh dark green leaves. Medium-sized flowers open in April. These are broad oval to almost round and maintain this shape throughout the flowering period. The flowers are deep purple-red and have a warm appearance. Like several other modern Magnolia cultivars, 'Genie' flowers richly at a young age. Hardiness zone 6.
