

Malus floribunda

Height	6 m
Width	4-5m
Crown	round to umbel-shaped, half-open crown
Bark and branches	grey-brown, smooth, mature trunks peeling in thin plates
Leaf	oval, dark green, 4 - 8 cm
Flowers	light pink, turning white, flower buds dark pink, about 0.4 cm, April/May
Fruits	yellow with red blush, Ø about 0.9 cm
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	Fertile, well drained soil
Paving	tolerates no paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Wind resistance	good, susceptible to sea wind
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
Application	tree containers, roof gardens, industrial areas, small gardens, patio gardens
Shape	clearstem tree, multi-stem treem
Origin	Japan

A vigorous ornamental apple tree with a rounded to umbellate crown and slightly pendulous branches. Height approx. 6 m. The oval leaves are dark green, 4 - 8 cm in size and sometimes slightly lobed at the base. The tree produces abundant light pink flowers that turn white and have a diameter of approx. 0.4 cm. When in bud they are dark pink. The masses of yellow fruit, later with a red blush, remain hanging in the tree for a long time and have a diameter of approx. 0.9 cm. Can be used in large gardens, parks and public gardens. The tree makes heavy demands on the soil as regards moisture supply and fertility. Fairly insensitive to scab but sensitive to mildew. Winter hardiness zone: 4
