

Populus tremula 'Erecta'

Height	15 m
Width	1-2m
Crown	narrow columnar, half-open crown
Bark and branches	twigs yellow-brown, bark light grey, smooth
Leaf	round to ovate, matt green, 3 - 8 cm long
Flowers	♂ catkins
Fruits	none: male tree, fruitless cultivar
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	any
Soil moisture	suitable for dry soil, withstand short flood, withstand long flood
Paving	tolerates no paving
Winter hardiness zone	2 (-45,5 to -40,1 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt, valuable for butterflies
Application	avenues and broad streets, coastal areas
Shape	clearstem tree, feathered tree
Origin	Västergötland, Sweden, 1847

A medium sized tree, found in the mid-19th century in Sweden, with a height of approx. 15 m. The crown is narrow columnar. The leaves are round to ovoid and have a roughly serrated edge. The matt green leaves are 3 - 8 cm in size and have a bluish-green underside. The young leaves are a pretty bronze colour. The autumn colour is yellow to orange. Because of the long leaf stems the tree moves even in a light wind. Produces male catkins and thus no fruit. Little sensitive to sea wind or de-icing salt. Winter hardiness zone: 2
