

Prunus domestica 'Goccia d'Oro'

Height	6-9 m
Width	4-6m
Crown	round/spherical, half-open crown, capricious growing
Bark and branches	brown
Leaf	green
Flowers	white, flowers in April
Fruits	edible fruits, yellow
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil
Paving	tolerates no paving
Winter hardiness zone	6 (-23,3 to -17,8 °C)
Other resistances	resistant to frost (WH 1 - 6)
Fauna tree	resistant to frost (WH 1 - 6), valuable for bees (honey plant)
Application	small gardens, patio gardens
Shape	clearstem tree, clearstem fruit tree

'Goccia d'Oro' is a medium strong-growing plum tree with a semi-open crown of 6-9 m in height. The crown is round and slightly irregular in shape. In April, the white flowers open, measuring about 2.5 cm. 'Goccia d'Oro' is self-pollinating, which means that no tree of another plum variety needs to be nearby for good fruit bearing. The plums of 'Goccia d'Oro' are large, almost round and greenish yellow to deep yellow in colour, with a pale haze. The flesh is also yellow, firm, very juicy and sweet and flavourful. The plums are very suitable for direct consumption. Picking time is from the end of July to the end of August. Hardiness zone 6.
