

Quercus libani 'Angustifolia'

Height	12 m
Width	8-10m
Crown	broad ovoid, later rounded, dark, dense crown
Bark and branches	grey
Leaf	green
Flowers	golden-yellow, flowers in May
Fruits	brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, calcareous soil
Soil moisture	suitable for wet soil
Paving	tolerates no paving
Winter hardiness zone	6b (-20,5 to -17,8 °C)
Wind resistance	fairly
Other resistances	resistant to frost (WH 1 - 6), resistant to de-icing salt
Application	industrial areas
Shape	clearstem tree

This narrow-leaved variety of Lebanon oak forms a graceful medium-sized tree with a broad ovoid crown. The tree grows with relatively thin twigs, forming a dense crown. The young twigs are lacy and covered with downy grey-white hairs. The leaf is lanceolate, 5 to 10 cm long and 1.5 to 2 cm wide. On the upper side it is a glossy dark green, the underside is lighter. Like the species, the edge is sharply toothed. The acorns are two-thirds enclosed by the nap, which is set with broad adjacent scales. A beautiful, graceful park tree first described in 1892.
