

## Tilia platyphyllos 'Fastigiata'

<b>Height</b>	25-30 m
<b>Width</b>	10-15m
<b>Crown</b>	narrow conical, half-open crown
<b>Bark and branches</b>	grey
<b>Leaf</b>	green
<b>Flowers</b>	yellow, flowers in June, fragrant flowers
<b>Fruits</b>	grey, brown
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
<b>Paving</b>	tolerates no paving
<b>Winter hardness zone</b>	4 (-34,4 to -28,9 °C)
<b>Wind resistance</b>	good, susceptible to sea wind
<b>Other resistances</b>	resistant to frost (WH 1 - 6), can withstand wind
<b>Fauna tree</b>	resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies
<b>Application</b>	avenues and broad streets, narrow streets
<b>Shape</b>	clearstem tree

A narrow, pyramidal form of the summer linden with ascending branches bearing upwards-slanting twigs. The trunk is light grey and later grooved. After one year, twigs are hairy and reddish brown, and become bare in the winter. The leaves of 'Fastigiata' are rounder than those of the species and have a tapered top and a slightly heart-shaped, nearly round base. The leaf edge is sharply serrated. The upper side of the leaf is dark green while the underside is lighter with soft hair. The fruit remains on the tree for a long time in the autumn. The aromatic flowers grow in pendulous umbels of 3 to 5 together. Suitable for narrower streets. Winter hardiness zone: 4
