

## ***Ulmus parvifolia BOSQUE* ('UPMTF')**

<b>Height</b>	7 - 10 m
<b>Width</b>	6-9m
<b>Crown</b>	oval, dark, dense crown
<b>Bark and branches</b>	twigs glossy grey-brown, bark brown-grey, peeling in small platelets
<b>Leaf</b>	ovate, oval to obovate, slightly crooked, glossy dark green, 2 - 6 cm
<b>Autumn colour</b>	yellow, orange
<b>Flowers</b>	in dense clusters, green, September
<b>Fruits</b>	flat winged nutlets, oval, green slightly red hue
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	fertile, moist and airy, tolerates limy soil
<b>Soil moisture</b>	suitable for dry soil, withstand short flood
<b>Paving</b>	tolerates paving
<b>Winter hardiness zone</b>	6 (-23,3 to -17,8 °C)
<b>Wind resistance</b>	fairly to good
<b>Other resistances</b>	resistant to frost (WH 1 - 6), can withstand wind
<b>Application</b>	avenues and broad streets, industrial areas
<b>Shape</b>	clearstem tree
<b>Origin</b>	Tree Introductions, Inc., Bishop, GA, USA, 1998
<b>Synonyms</b>	<i>Ulmus parvifolia 'Bosque'</i>

Medium-size tree with a very regular, dense oval crown and a height of 7 to 10 m. The young twigs are glossy brown and slightly hairy, but rapidly become hairless. The old bark is brown-grey and peels off in small plates revealing the orange bast. The ovate, oval to obovate leaves are quite small and glossy dark green. The tree blossoms in September with clusters of inconspicuous green flowers, followed by seeds enclosed in wings. In autumn the leaf turns dark yellow to yellow-orange, only falling in late autumn. Its good resistance to Dutch elm disease and its good crown shape makes this cultivar worth considering as a park tree or avenue tree. It has a great adaptability to various soil types, tolerates drought, a lot of warmth and is wind resistant.
