

Magnolia 'Betty'

Height	4-6 m
Width	4-6m
Crown	round, half-open crown, capricious growing
Bark and branches	grey
Leaf	green
Flowers	lilac pink to purple pink, flowers in April-May (June)
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
Paving	tolerates partial paving
Winter hardiness zone	6 (-23,3 to -17,8 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Application	small gardens
Shape	clearstem tree, multi-stem treem

Magnolia 'Betty' is a large shrub that under the right conditions grows into a small tree with a somewhat irregular, rounded crown. The tree then grows 4 to 6 m tall and wide. The flowers open in April and early May. They are star-shaped and up to about 20 cm in diameter. The petals are light lilac-pink and turn darker purplish-pink towards the centre of the flower. Usually the petals are slightly twisted in the longitudinal axis. Each flower has 12 to 19 petals.
