

Sequoiadendron gig. 'Healthy Mammoth Two' PBR

Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil moisture	suitable for wet soil
Paving	tolerates no paving
Winter hardiness zone	7a (-17,7 to -15,0 °C)
Other resistances	can withstand wind
Application	parks, cemeteries, large gardens
Shape	clearstem conifer, specimen conifer

'Healthy Mammoth Two' is a Sequoiadendron selection that is less susceptible to Botrytis. This fast-growing conifer reaches a height of 30-50 (100) meters, forming a pyramidal, semi-open crown. Its reddish-brown, fibrous trunk is deeply grooved. The bluish-green, scale-like needles are 1-1.2 cm long and evergreen. The upright, reddish-brown cones grow to a size of 5-8 cm. This cultivar thrives in nutrient-rich, even moist soils and is hardy to zone 7a.
