

Ginkgo biloba 'Mascia'

Height	15-20 m
Width	8-10m
Crown	narrow conical, light, open crown, capricious growing
Bark and branches	brown, grey
Leaf	green, spout green-yellow
Autumn colour	yellow
Flowers	inconspicuous, April/May
Fruits	fruitless cultivar
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	all
Paving	tolerates paving
Winter hardiness zone	5a (-28,8 to -26,1 °C)
Wind resistance	fairly to good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Application	avenues and broad streets, tree containers, roof gardens, industrial areas
Shape	clearstem tree, clearstem conifer, specimen conifer

Ginkgo biloba 'Mascia' is a medium to large tree with a narrow pyramidal crown growing 15 to 20 m high. The crown is open in structure, characteristic of most Ginkgo cultivars. A characteristic feature of 'Mascia' is that the crown is slightly irregularly shaped. When unfurling, the leaves are green-yellow, but they soon turn green. The autumn colour is yellow. Like all Ginkgo trees, 'Mascia' is suitable for all soil types, tolerates paving, is reasonably to well resistant to wind and very hardy. Versatile in gardens, parks, avenues and streets. But also suitable for modern applications such as in roof gardens and tree boxes. Hardiness zone: 5a
