

Ginkgo biloba 'Simon'

Height	2-3 m
Width	2-3m
Crown	vase-shaped, dark, dense crown, capricious growing
Bark and branches	twigs light brown, bark grey-brown
Leaf	fan-shaped, in bundles of 3-5, green
Autumn colour	yellow
Flowers	inconspicuous, April/May
Fruits	fruitless cultivar
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
Paving	tolerates paving
Winter hardiness zone	5a (-28,8 to -26,1 °C)
Wind resistance	fairly to good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Application	tree containers, roof gardens, industrial areas, small gardens, patio gardens
Shape	multi-stem treem, specimen conifer

Ginkgo biloba 'Simon' forms an attractive, almost shrubby small tree that eventually grows 2 to 3 m tall. At a young age, the crown is broadly oval, later growing into a vase-shaped crown. Branching is dense and the branches and twigs grow somewhat erratically, giving the tree an attractive, less austere appearance. The leaves have the fan shape characteristic of Ginkgo. In autumn, the green leaves turn deep yellow. Fine cultivar for more small-scale applications in parks, gardens, cemeteries, etc. The fact that the tree tolerates paving well contributes to the wide applicability of 'Simon'.
