

Ginkgo biloba 'Tremonia'

Height	10 - 12 m
Width	3-4m
Crown	columnar to oval, light, open crown, capricious growing
Bark and branches	twigs light brown, bark grey-brown, later deeply grooved
Leaf	in clusters of 3 - 5, fan-shaped, 7 - 10 cm long, green
Autumn colour	yellow
Flowers	green, inconspicuous, April/May
Fruits	none: male cultivar, fruitless cultivar
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	any
Paving	tolerates paving
Winter hardiness zone	5a (-28,8 to -26,1 °C)
Wind resistance	fairly to good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Application	avenues and broad streets, narrow streets, tree containers, roof gardens, industrial areas
Shape	clearstem tree, feathered tree, multi-stem treem, clearstem conifer, specimen conifer
Origin	Botanischer Garten Rombergpark, Dortmund, Germany, 1970

A column-shaped selection with a remarkably straight main stem and open branching. 'Tremonia' is slow-growing, especially when young, and remains very narrow, even when mature. Height 10 - 12 m. Width to approx. 5 m. The fan-shaped leaves and flower buds are on short shoots. The leaves grow in bundles of 3 - 5 together and have an incised top. Adding decorative value is the golden yellow colour this tree turns in autumn. 'Tremonia' is a male type that is excellently suited as a street tree, thanks to its lack of fruit. Its narrow crown renders it suitable for small gardens, as well. Requires a site with ample light. Winter hardiness zone: 5a
