

# Acer saccharinum 'Laciniatum Wieri'

<b>Height</b>	20 m, fast growing
<b>Width</b>	14-16m
<b>Crown</b>	round to broad fan-shaped, half-open crown, capricious growing
<b>Bark and branches</b>	grey and smooth
<b>Leaf</b>	palmate, lobes very deeply dissected, bright green, 8 - 15 cm, autumn colour yellow
<b>Autumn colour</b>	yellow
<b>Flowers</b>	green-yellow, inconspicuous, March
<b>Fruits</b>	winged nutlets, 4 - 5 cm long
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	both wet and dry soil, tolerates paved surfaces
<b>Soil moisture</b>	withstand short flood, withstand long flood
<b>Paving</b>	tolerates partial paving
<b>Winter hardiness zone</b>	4 (-34,4 to -28,9 °C)
<b>Wind resistance</b>	moderate to poor
<b>Other resistances</b>	resistant to frost (WH 1 - 6)
<b>Fauna tree</b>	resistant to frost (WH 1 - 6), valuable for bees (honey plant)
<b>Application</b>	avenues and broad streets, industrial areas
<b>Shape</b>	clearstem tree, multi-stem treem
<b>Origin</b>	Ellwanger & Barry Nursery, Rochester, NY, USA, 1875
<b>Synonyms</b>	Acer saccharinum var. wieri

Large tree with upright, loose branches that eventually spread widely creating a wide, fan-shaped crown. Height and spread circa 20 m. Unfurling leaf is bronze coloured. In summer it turns green with a grey-white underside that is lighter than of the species. The leaf is deeply lobed and varies in size. Autumn colour yellow. Shallow rooting with strongly branching main roots and fibrous rootlets. May push up hard surfaces. Tolerant to moist soils. 'Laciniatum' is a general name for many varieties with deeply lobed leaves. So, several plants with this name are for sale. Winter hardiness zone: 4
