

Fagus sylvatica 'Quercifolia'

Height	20 m
Width	18-20m
Crown	round/spherical, dark, dense crown
Bark and branches	grey
Leaf	green
Autumn colour	yellow
Flowers	yellowgreen, flowers in May
Fruits	brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	loamy soil, sandy soil, peaty soil, calcareous soil
Paving	tolerates no paving
Winter hardiness zone	5b (-26,0 to -23,4 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Shape	clearstem tree, feathered tree

Fagus sylvatica 'Quercifolia' is a fairly tall tree with a spreading spherical crown. Height circa 20 m. The green leaf has some resemblance with that of the oak (Quercus). It is ovate to oblong and has short, wide lobes. The margin is sometimes toothed. The leaf has a very regular shape and turns yellow brown in autumn. Inconspicuous flowering. 'Quercifolia' thrives in soil that is not too wet, well-drained and rich in humus content. Suitable as a park tree and a solitary. Moderate wind resistance. Winter hardiness zone: 5b
