

Magnolia ×soulangeana 'Alba Superba'

Height	5-6 m
Width	5-6m
Crown	broad vase-shaped, dark, dense crown, capricious growing
Bark and branches	brown, grey
Leaf	green, green/yellow
Flowers	white, pinkviolet spot, flowers in April
Fruits	orange, red
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
Paving	tolerates partial paving
Winter hardiness zone	6 (-23,3 to -17,8 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Application	tree containers, roof gardens, small gardens
Shape	clearstem tree, multi-stem treem

Slow growing, large, densely branching shrub. Grows after many years into a small, multi-stemmed tree with a broad vase-shaped to broad ovoid crown. Eventually attains a height of 6 m. The flowers have the characteristic tulip shape of Magnolia x soulangeana. They are pure white on the outside with a pinkish purple mark at the base of each petal. The flower's inside is white. Of all the M. x soulangeana cultivars, its flowers are among the first to open, around early to mid-April. It is an old cultivar that originated in Belgium in the mid-19th century. Suitable for parks and gardens.
