

Magnolia stellata 'Royal Star'

Height	4-6 m
Width	4-6m
Crown	round/spherical, dark, dense crown, capricious growing
Bark and branches	grey
Leaf	green
Flowers	pure white, flowers in March
Fruits	fruitless cultivar
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
Paving	tolerates partial paving
Winter hardiness zone	5b (-26,0 to -23,4 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Application	tree containers, small gardens, patio gardens
Shape	clearstem tree, multi-stem treem

Usually a big shrub but sometimes grafted onto a trunk to generate a small tree with a round crown. Grows more vigorously than other in the species. Branches very densely, eventually becoming about 4 m wide. The mid-green leaf is slightly glossy. The teardrop-shaped flower buds have soft hairs and are visible on the plant before winter. On opening, the star-shaped flowers are silvery, soft pink. The fully opened flowers are pure white. They can consist of 25 petals, giving the flowers a nice 'full' look. Even young plants bear many flowers. Suitable for use in parks and gardens.
