

## Prunus ×yedoensis

|                              |                                                          |
|------------------------------|----------------------------------------------------------|
| <b>Height</b>                | 6 - 10 m                                                 |
| <b>Width</b>                 | 6-10m                                                    |
| <b>Crown</b>                 | broad vase-shaped, half-open crown, capricious growing   |
| <b>Bark and branches</b>     | twigs light brown, bark grey-brown, smooth               |
| <b>Leaf</b>                  | broad oval, green, 6 - 12 cm                             |
| <b>Autumn colour</b>         | yellow                                                   |
| <b>Flowers</b>               | white, about 3.5 cm, buds pink, April, fragrant flowers  |
| <b>Fruits</b>                | round, black, Ø about 1 cm                               |
| <b>Spines/thorns</b>         | None                                                     |
| <b>Toxicity</b>              | usually not toxic to people, (large) pets and livestock  |
| <b>Soil type</b>             | any: not in wet soils                                    |
| <b>Paving</b>                | tolerates no paving                                      |
| <b>Winter hardiness zone</b> | 6a (-23,3 to -20,6 °C)                                   |
| <b>Wind resistance</b>       | fairly                                                   |
| <b>Other resistances</b>     | resistant to frost (WH 1 - 6)                            |
| <b>Fauna tree</b>            | resistant to frost (WH 1 - 6), provides food for birds   |
| <b>Application</b>           | avenues and broad streets, tree containers, roof gardens |
| <b>Shape</b>                 | clearstem tree, multi-stem treem                         |
| <b>Origin</b>                | Japan, 1864                                              |

Prunus x yedoensis is a medium-sized tree that attains a height of 6 - 10 m. The crown is board vase-shaped and the ends of the branches are pendulous so that the crown eventually becomes flattened. The wide oval leaves are 6 - 12 cm long. Emerging leaves are very light green. The autumn colour is yellow. Abundant flowers in April. The flowers are pale pink in the bud and emerge white. They have a slight almond scent. Flower diameter approx. 3.5 cm. Black drupes in the late summer. Winter hardiness zone: 6a
