

Prunus domestica 'Mirabelle de Nancy'

Height	4-6 m
Width	4-5m
Crown	round/spherical, dark, dense crown, capricious growing
Bark and branches	brown
Leaf	green
Flowers	white, slightly fragrant, flowers in April
Fruits	edible fruits, yellow
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil
Paving	tolerates no paving
Winter hardiness zone	6 (-23,3 to -17,8 °C)
Other resistances	resistant to frost (WH 1 - 6)
Fauna tree	resistant to frost (WH 1 - 6), valuable for bees (honey plant)
Application	small gardens, patio gardens
Shape	clearstem tree, multi-stem treem, clearstem fruit tree

'Mirabelle de Nancy' is a plum tree with a bushy, dense crown of 4-6 m in height. The crown is round and sometimes slightly irregular in shape. The lightly scented, white blossom opens in April. Although 'Mirabelle de Nancy' is self-pollinating, the tree will produce more fruit after cross-pollination by another plum variety. Preferably, 'Hauszwetsche' or 'Reine Claude d'Althan' can be used for this purpose. Plums can be picked around mid-August. They are small, round and yellow with small red dots or spots. The yellowish flesh is soft, juicy and remarkably sweet. 'Mirabelle de Nancy' is also known by its popular name crocus plum; the plums are very suitable for direct consumption or processing into purée. 'Mirabelle de Nancy' probably originates from the Middle East or Asia and was imported to France in the 16th century. Hardiness zone 6.
