

Pyrus calleryana 'Bradford'

Height	10-12 m
Width	5-8m
Crown	round/spherical, half-open crown
Bark and branches	brown
Leaf	green
Autumn colour	red, purple
Flowers	white, flowers in April
Fruits	brown, little
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, nutrient-poor soil, calcareous soil
Paving	tolerates paving
Winter hardiness zone	6a (-23,3 to -20,6 °C)
Wind resistance	good, also on the coast
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, valuable for bees (honey plant)
Application	avenues and broad streets, tree containers, roof gardens, coastal areas, industrial areas
Shape	clearstem tree

An American cultivar with an ovoid crown. Later, the crown sinks and becomes round to nearly fan-shaped. Height up to approx. 12 m. The glossy, deep green leaves remain on the tree until late in the autumn and eventually turn faintly purple. Abundant white flowers in umbels. The brown fruit, measuring approx. 1 cm, does not appear very often. Suitable as a solitary tree and along avenues and streets. This tree, particularly when young, is not as winter-hardy as the cultivar 'Chanticleer'. A sheltered site is recommended. Tolerates air pollution well, like all the cultivars of *Pyrus calleryana*. Winter hardiness zone: 6a
