

Quercus ×hispanica 'Diversifolia'

Height	5-8 m
Width	5-8m
Crown	flatened spherical, half-open crown
Bark and branches	grey
Leaf	evergreen
Flowers	light yellow, flowers in April
Fruits	brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	loamy soil, sandy soil, calcareous soil
Soil moisture	suitable for wet soil
Paving	tolerates no paving
Winter hardiness zone	7 (-17,7 to -12,3 °C)
Wind resistance	good
Other resistances	can withstand wind, resistant to de-icing salt
Application	industrial areas
Shape	clearstem tree, feathered tree

Semi-evergreen to full evergreen tree, 5 to 8 m tall, with a round to flat-topped spherical crown. The thick bark is dark grey, deeply grooved and highly corky. The ovate leaves have a very variable margin. A characteristic of this cultivar is that the leaves have a half-moon shaped dissection in the middle. There may be several small lobes above and below this dissection. Fruit is the same as the species. During severe cold, the leaves turn brown in the winter, only falling when the new leaves emerge. A healthy, warmth-loving tree which prefers a limy soil.
