

## Sorbus aucuparia 'Rossica Major'

|                       |                                                                            |
|-----------------------|----------------------------------------------------------------------------|
| Height                | 8-10 m                                                                     |
| Width                 | 6-8m                                                                       |
| Crown                 | ovoid / egg-shaped, half-open crown                                        |
| Bark and branches     | grey                                                                       |
| Leaf                  | green, feathered leaf                                                      |
| Autumn colour         | orange, red                                                                |
| Flowers               | white, flowers in May                                                      |
| Fruits                | orange, red                                                                |
| Spines/thorns         | None                                                                       |
| Toxicity              | usually not toxic to people, (large) pets and livestock                    |
| Soil type             | loamy soil, sandy soil, acid soil, calcareous soil                         |
| Soil moisture         | suitable for dry soil                                                      |
| Paving                | tolerates no paving                                                        |
| Winter hardiness zone | 4 (-34,4 to -28,9 °C)                                                      |
| Wind resistance       | good                                                                       |
| Other resistances     | resistant to frost (WH 1 - 6), can withstand wind                          |
| Fauna tree            | resistant to frost (WH 1 - 6), can withstand wind, provides food for birds |
| Application           | avenues and broad streets, narrow streets, tree containers, roof gardens   |
| Shape                 | clearstem tree                                                             |

Sorbus aucuparia 'Rossica Major' is a vigorous tree with branches that grow vertically and an ovoid crown. Height 8 - 10 m. The leaves are a remarkable deep green and the leaf stem is red and bears soft hairs. The separate leaves can be 8 cm long and have variable autumnal colours. Large umbels of relatively large, often more than 1.5 cm in diameter, deep red fruits appear in August and September. Winter hardiness zone: 4
