

Sorbus aucuparia 'Wettra'

Height	10-12 m
Width	4-6m
Crown	broad ovoid, half-open crown
Bark and branches	grey
Leaf	green, feathered leaf
Autumn colour	yellow, orange, red
Flowers	white, flowers in May
Fruits	red
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	loamy soil, sandy soil, peaty soil, acid soil
Soil moisture	suitable for dry soil
Paving	tolerates no paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
Application	avenues and broad streets, narrow streets, tree containers, roof gardens
Shape	clearstem tree

This cultivar has a vigorous vertical manner of growth taking it to 10 - 12 m in height. The smooth trunk is light grey and the young twigs are brown and bear many lenticels. The imparipinnate leaves consist of 9 - 17 (21) elongated leaflets with a roughly serrated edge. 'Wettra' has a yellow to orange-red autumnal colour and an abundance of red fruits. It makes few demands on the soil and can therefore be planted on many sites. Because of its vigorous vertical growth 'Wettra' is regarded as a good cultivar, to be recommended rather than the species. Winter hardiness zone: 4
