Tamarix tetrandra

| Height | 4 - 5 m |
|-----------------------|--|
| Width | 4-5m |
| Crown | fan-shaped , light, open crown, capricious growing |
| Bark and branches | black bar, twigs shiny and dark reddish brown |
| Leaf | scaly, tapering to a point, bright green, 0.1 – 0.5 cm |
| Flowers | in tight clusters, light pink, April/June |
| Fruits | unremarkable fruit capsules |
| Spines/thorns | None |
| Toxicity | usually not toxic to people, (large) pets and livestock |
| Soil type | parks, small gardens, coastal areas |
| Soil moisture | suitable for dry soil, withstand short flood |
| Paving | tolerates no paving |
| Winter hardiness zone | 6a (-23,3 to -20,6 °C) |
| Wind resistance | good |
| Other resistances | resistant to frost (WH 1 - 6), can withstand wind |
| Fauna tree | resistant to frost (WH 1 - 6), can withstand wind, valuable for bees (honey plant) |
| Application | tree containers, roof gardens, industrial areas, small gardens, patio gardens |
| Shape | clearstem tree |
| Origin | south-eastern Europe and Western Asia |
| | |

Large bush that grows into a small tree with pendulous twigs. The nearly black bark is slightly grooved at a later age. The twigs are shiny and dark reddish brown. The scaly, narrow, oval leaves are bright green and have a semi-perfoliate base. Leaves on young twigs are oval and 0.4 - 0.5 cm wide, on older branches much smaller, approx. 0.1 cm. Small pale pink flowers grow in tight clusters, 4 - 6 cm long. The crown leaves fall off quickly, but the 4 stamens remain a long time. After flowering, small capsule fruits containing plentiful seeds appear. This Tamarix is excellently suited for coastal areas. When the plant is not blooming, it bears a superficial similarity to some conifers.
