Tilia cordata 'Böhlje'

Height 12 - 18 m Width 6-9 m Crown conical, later broader, dark, dense crown Bark and branches dark brown, grooved, young twigs green, reddish-brown later Leaf more or less round, dark green 5 to 12 cm Autumn colour yellow Flowers in umbels, yellow to cream-coloured, pungent, June/July, fragrant flowers Fruits round-ovoid, Ø 0.5 - 0.8 cm, first felt-like, later bare Spines/thorns None Toxicity usually not toxic to people, (large) pets and livestock Soil type any, tolerates dry conditions Soil moisture suitable for dry soil Paving tolerates paving Winder hardiness zone 4 (-34,4 to -28,9 °C) Wind resistance very good, also tolerates sea wind Other resistances resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies Fauna tree resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies Application avenues and broad streets, narrow streets, coastal areas Shape clearstem tree Origin Böhlje, Westerstede, Germany, late 1800		
Crown conical, later broader, dark, dense crown Bark and branches dark brown, grooved, young twigs green, reddish-brown later Leaf more or less round, dark green 5 to 12 cm Autumn colour yellow Flowers in umbels, yellow to cream-coloured, pungent, June/July, fragrant flowers Fruits round-ovoid, Ø 0.5 – 0.8 cm, first felt-like, later bare Spines/thorns None Toxicity usually not toxic to people, (large) pets and livestock Soil type any, tolerates dry conditions Soil moisture suitable for dry soil Paving tolerates paving Winter hardiness zone 4(-34, to -28,9 °C) Wind resistance very good, also tolerates sea wind Other resistances resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies Application avenues and broad streets, narrow streets, coastal areas Shape clearstem tree Origin Böhlje, Westerstede, Germany, late 1800	Height	12 - 18 m
Bark and branches dark brown, grooved, young twigs green, reddish-brown later Leaf more or less round, dark green 5 to 12 cm Autumn colour yellow Flowers in umbels, yellow to cream-coloured, pungent, June/July, fragrant flowers Fruits round-ovoid, Ø 0.5 – 0.8 cm, first felt-like, later bare Spines/thorns None Toxicity usually not toxic to people, (large) pets and livestock Soil type any, tolerates dry conditions Soil moisture suitable for dry soil Paving tolerates paving Winter hardiness zone 4 (-34,4 to -28,9 °C) Wind resistance very good, also tolerates sea wind Other resistances resistant to frost (WH 1 - 6), can withstand wind Fauna tree resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies Application avenues and broad streets, narrow streets, coastal areas Shape clearstem tree Origin Böhlje, Westerstede, Germany, late 1800	Width	6-9m
Leaf more or less round, dark green 5 to 12 cm Autumn colour yellow Flowers in umbels, yellow to cream-coloured, pungent, June/July, fragrant flowers Fruits round-ovoid, Ø 0.5 - 0.8 cm, first felt-like, later bare Spines/thorns None Toxicity usually not toxic to people, (large) pets and livestock Soil type any, tolerates dry conditions Soil moisture suitable for dry soil Paving tolerates paving Winter hardiness zone 4 (-34,4 to -28,9 °C) Wind resistance very good, also tolerates sea wind Other resistances resistant to frost (WH 1 - 6), can withstand wind Fauna tree resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies Application avenues and broad streets, narrow streets, coastal areas Shape clearstem tree Origin Böhlje, Westerstede, Germany, late 1800	Crown	conical, later broader, dark, dense crown
Autumn colour yellow Flowers in umbels, yellow to cream-coloured, pungent, June/July, fragrant flowers Fruits round-ovoid, Ø 0.5 – 0.8 cm, first felt-like, later bare Spines/thorns None Toxicity usually not toxic to people, (large) pets and livestock Soil type any, tolerates dry conditions Soil moisture suitable for dry soil Paving tolerates paving Winder hardiness zone 4 (-34,4 to -28,9 °C) Wind resistance very good, also tolerates sea wind Other resistances resistant to frost (WH 1 - 6), can withstand wind Fauna tree resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies Application avenues and broad streets, narrow streets, coastal areas Shape clearstem tree Origin Böhlje, Westerstede, Germany, late 1800	Bark and branches	dark brown, grooved, young twigs green, reddish-brown later
Flowers in umbels, yellow to cream-coloured, pungent, June/July, fragrant flowers Fruits round-ovoid, Ø 0.5 − 0.8 cm, first felt-like, later bare Spines/thorns None Toxicity usually not toxic to people, (large) pets and livestock Soil type any, tolerates dry conditions Soil moisture suitable for dry soil Paving tolerates paving Winter hardiness zone 4 (-34,4 to -28,9 °C) Wind resistance very good, also tolerates sea wind Other resistances resistant to frost (WH 1 − 6), can withstand wind, valuable for butterflies Application avenues and broad streets, narrow streets, coastal areas Shape clearstem tree Origin Böhlje, Westerstede, Germany, late 1800	Leaf	more or less round, dark green 5 to 12 cm
Fruits round-ovoid, Ø 0.5 − 0.8 cm, first felt-like, later bare Spines/thorns None Toxicity usually not toxic to people, (large) pets and livestock Soil type any, tolerates dry conditions Soil moisture suitable for dry soil Paving tolerates paving Winder hardiness zone 4 (-34,4 to -28,9 °C) Wind resistance very good, also tolerates sea wind Other resistances resistant to frost (WH 1 - 6), can withstand wind Fauna tree resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies Application avenues and broad streets, narrow streets, coastal areas Shape clearstem tree Origin Böhlje, Westerstede, Germany, late 1800	Autumn colour	yellow
Spines/thornsNoneToxicityusually not toxic to people, (large) pets and livestockSoil typeany, tolerates dry conditionsSoil moisturesuitable for dry soilPavingtolerates pavingWinter hardiness zone4 (-34,4 to -28,9 °C)Wind resistancevery good, also tolerates sea windOther resistancesresistant to frost (WH 1 - 6), can withstand windFauna treeresistant to frost (WH 1 - 6), can withstand wind, valuable for butterfliesApplicationavenues and broad streets, narrow streets, coastal areasShapeclearstem treeOriginBöhlje, Westerstede, Germany, late 1800	Flowers	in umbels, yellow to cream-coloured, pungent, June/July, fragrant flowers
Toxicityusually not toxic to people, (large) pets and livestockSoil typeany, tolerates dry conditionsSoil moisturesuitable for dry soilPavingtolerates pavingWinter hardiness zone4 (-34,4 to -28,9 °C)Wind resistancevery good, also tolerates sea windOther resistancesresistant to frost (WH 1 - 6), can withstand windFauna treeresistant to frost (WH 1 - 6), can withstand wind, valuable for butterfliesApplicationavenues and broad streets, narrow streets, coastal areasShapeclearstem treeOriginBöhlje, Westerstede, Germany, late 1800	Fruits	round-ovoid, Ø 0.5 – 0.8 cm, first felt-like, later bare
Soil typeany, tolerates dry conditionsSoil moisturesuitable for dry soilPavingtolerates pavingWinter hardiness zone4 (-34,4 to -28,9 °C)Wind resistancevery good, also tolerates sea windOther resistancesresistant to frost (WH 1 - 6), can withstand windFauna treeresistant to frost (WH 1 - 6), can withstand wind, valuable for butterfliesApplicationavenues and broad streets, narrow streets, coastal areasShapeclearstem treeOriginBöhlje, Westerstede, Germany, late 1800	Spines/thorns	None
Soil moisturesuitable for dry soilPavingtolerates pavingWinter hardiness zone4 (-34,4 to -28,9 °C)Wind resistancevery good, also tolerates sea windOther resistancesresistant to frost (WH 1 - 6), can withstand windFauna treeresistant to frost (WH 1 - 6), can withstand wind, valuable for butterfliesApplicationavenues and broad streets, narrow streets, coastal areasShapeclearstem treeOriginBöhlje, Westerstede, Germany, late 1800	Toxicity	usually not toxic to people, (large) pets and livestock
Paving tolerates paving Winter hardiness zone 4 (-34,4 to -28,9 °C) Wind resistance very good, also tolerates sea wind Other resistances resistant to frost (WH 1 - 6), can withstand wind Fauna tree resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies Application avenues and broad streets, narrow streets, coastal areas Shape clearstem tree Origin Böhlje, Westerstede, Germany, late 1800	Soil type	any, tolerates dry conditions
Wind resistance very good, also tolerates sea wind Other resistances resistant to frost (WH 1 - 6), can withstand wind Fauna tree resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies Application avenues and broad streets, narrow streets, coastal areas Shape clearstem tree Origin Böhlje, Westerstede, Germany, late 1800	Soil moisture	suitable for dry soil
Wind resistance very good, also tolerates sea wind Other resistances resistant to frost (WH 1 - 6), can withstand wind Fauna tree resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies Application avenues and broad streets, narrow streets, coastal areas Shape clearstem tree Origin Böhlje, Westerstede, Germany, late 1800	Paving	tolerates paving
Other resistances resistant to frost (WH 1 - 6), can withstand wind Fauna tree resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies Application avenues and broad streets, narrow streets, coastal areas Shape clearstem tree Origin Böhlje, Westerstede, Germany, late 1800	Winter hardiness zone	4 (-34,4 to -28,9 °C)
Fauna tree resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies Application avenues and broad streets, narrow streets, coastal areas Shape clearstem tree Origin Böhlje, Westerstede, Germany, late 1800	Wind resistance	very good, also tolerates sea wind
Application avenues and broad streets, narrow streets, coastal areas Shape clearstem tree Origin Böhlje, Westerstede, Germany, late 1800	Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Shape clearstem tree Origin Böhlje, Westerstede, Germany, late 1800	Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies
Origin Böhlje, Westerstede, Germany, late 1800	Application	avenues and broad streets, narrow streets, coastal areas
	Shape	clearstem tree
Synonyme Tilia cordata 'Erocta' Tilia cordata 'Soloct'	Origin	Böhlje, Westerstede, Germany, late 1800
Synonyms Thia Cordata Erecta, Thia Cordata Select	Synonyms	Tilia cordata ' Erecta', Tilia cordata 'Select'

A cultivar of T. cordata discovered as a seedling, which starts out with a narrow, conical, compact crown that becomes broader later. Height 12-18 m, width up to 12 m. The trunk is dark brown and grooved, young twigs are green to reddish brown. The dark green leaves generally have a slanted, heart-shaped base and taper to an abrupt point at the top. They are bluish green underneath and turn a remarkable yellowish colour in the autumn. Pungent flowers appear in early summer, growing 5 – 10 together in short umbels. The light green bract is somewhat shorter than the umbel. Small fruit follow in late summer. These are grey and felt-like at first and later bare. T. cordata and cultivars are not very prone to aphids. Its narrow manner of growth makes 'Böhlje' excellently suitable for streets and avenues.
