

Ulmus minor 'Sarniensis'

Height	20 m
Width	8-10m
Crown	narrow conical, half-open crown
Bark and branches	flaking, brown, grey
Leaf	green
Autumn colour	yellow
Flowers	redbrown, flowers in March
Fruits	brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, calcareous soil
Soil moisture	suitable for wet soil, withstand short flood
Paving	tolerates paving
Winter hardiness zone	5a (-28,8 to -26,1 °C)
Wind resistance	very good, also tolerates sea wind
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies
Application	avenues and broad streets, narrow streets, industrial areas
Shape	clearstem tree
Synonyms	Ulmus campestris wheatleyi

Ulmus minor 'Sarniensis' (syn. U. campestris 'Monumentalis', U. c. 'Wheatleyi') is a large tree with a dead straight trunk and a regular narrow pyramidal manner of growth. It attains a height of approx. 20 m. The crown is formed by sturdy short-spreading branches. The rough flakey bark, particularly in older specimens, is a characteristic feature. The relatively small leaves are broad ovoid and dark green. They come out late in the spring and turn yellow in the autumn. They stay on the tree for a long time. 'Sarniensis' is sensitive to Dutch elm disease. Winter hardiness zone: 5a
