

Ulmus 'Morton Glossy'

Height	10-15 m
Width	10-14m
Crown	vase-shaped, half-open crown
Bark and branches	brown, grey
Leaf	green
Autumn colour	yellow, orange
Flowers	yellow, flowers in March
Fruits	brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, calcareous soil
Soil moisture	suitable for dry soil, suitable for wet soil, withstand short flood
Paving	tolerates paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Other resistances	resistant to frost (WH 1 - 6)
Application	avenues and broad streets, industrial areas

Ulmus 'Morton Glossy' (Ulmus TRIUMPH 'Morton Glossy') is a large tree with an oval, later broadly vase-shaped to fan-shaped crown up to 20 m high. The crown is dense and regular in shape. The leaves are quite small and slightly glossy. The leaves sprout early in spring, when they are more glossy. In autumn, the leaves turn yellow. Ulmus 'Morton Glossy' prefers a nutrient-rich, moist to even wet soil. The tree will tolerate even temporary flooding, provided it is in winter. Resistance to Dutch elm disease is good. Because of the width of its crown, the tree is unsuitable for use in narrow(er) streets. But for lanes and wide greenbelts, Ulmus 'Morton Glossy' is an excellent cultivar. The tree is very hardy. Ulmus 'Morton Glossy' arose from a complex cross involving the species U. davidiana and U. pumila. The tree was introduced in 1998 by the Morton Arboretum in Lisle, Illinois, USA. Hardiness zone 5.
